Professional Summary

Entry-Level Software Engineer with a Bachelor's degree in Computer Science and hands-on experience in Java, SQL, web development, and software engineering fundamentals. Strong problem-solving abilities with experience building full-stack academic projects. Quick learner with excellent communication and teamwork skills, eager to contribute to enterprise software development and rapidly adapt to new technologies and frameworks.

Education

- **B. Tech in Computer Science and Engineering**
Roland Institute of Technology, Berhampur, Odisha | Biju Patnaik University of Technology (BPUT), Odisha | CGPA: 8.3 | (Sept 2022 – Jun 2025)
- **Diploma in Information Technology**
Uma Charan Patnaik Engineering School, Berhampur, Odisha | 79% | 2022

Technical Training

Java Full Stack Development Training in JSpiders – Training & Development Center

- Completed hands-on Java Full Stack Development training covering Core Java, JDBC, Hibernate, Spring Framework, Spring Boot, Servlets, JSP, JavaScript, SQL, and responsive web development.
- Built end-to-end web applications integrating frontend and backend technologies. Deployed and tested Java web applications on Apache Tomcat Server.
- Participated in peer code reviews, debugging sessions, and collaborative development activities to improve software quality and coding standards.

Technical Skills

- Frontend: HTML, CSS, JavaScript, React.js, Responsive Web Design
- Backend: Java, Object-Oriented Programming (OOP), Spring Boot, REST APIs, JDBC, Hibernate (JPA), Software Development
- Programming: Java, Data Structures & Algorithms, Object-Oriented Programming (OOP), Collections Framework, Exception Handling, Multithreading, Problem Solving
- Database: MySQL, SQL, JDBC Connectivity, Database Design, Query Optimization
- Servers & Tools: Apache Tomcat, Git, GitHub, Maven
- Software Engineering: Requirement Analysis, Software Design, SDLC, Debugging, Troubleshooting, Unit Testing, Functional Testing, Technical Documentation, Team Collaboration, Communication Skills
- Development Concepts: MVC Architecture, CRUD Operations, Agile Methodology, Design Patterns, Session Management

- Cloud Basics: AWS Cloud Fundamentals (EC2, S3)

Projects

Task Management System:

- Developed a scalable J2EE-based Task Management Web Application using Core Java, Servlets, JSP, JDBC, and MySQL following MVC architecture and OOP principles.
- Implemented secure authentication, session management, and OTP-based password recovery using Java Mail API and Gmail SMTP integration.
- Developed and validated CRUD functionalities for task creation, updates, deletion, and category-based task management while ensuring data accuracy.
- Conducted unit testing, debugging, and troubleshooting to identify and resolve application and database issues, ensuring software reliability and performance.
- Applied DAO Design Pattern for modular development and successfully deployed and tested the application on Apache Tomcat Server using Git/GitHub for version control.

Secure Cart: Full-Stack Product Management & Authentication System

- Developing a scalable full-stack web application using Spring Boot, Hibernate, MySQL, JavaScript, and Bootstrap following RESTful architecture principles.
- Implemented secure JWT-based authentication and role-based access control to ensure secure user access and authorization.
- Developed RESTful product management modules supporting CRUD operations, pagination, search, and sorting for efficient data retrieval and management.
- Integrated asynchronous processing and centralized exception handling to improve application performance, reliability, and user experience.
- Performed unit testing, debugging, troubleshooting, and performance optimization throughout the software development lifecycle (SDLC).

Portfolio Website:

- Developed and deployed a responsive personal portfolio website using HTML, CSS, and JavaScript to showcase projects, technical skills, education, and contact information.
- Designed and implemented a user-friendly interface with responsive layouts and interactive frontend components to enhance user engagement.
- Integrated a contact form with Google Sheets for automated data collection and streamlined communication management.
- Optimized website performance, accessibility, and responsiveness across desktop, tablet, and mobile. Conducted testing, debugging, and maintenance to ensure a seamless user experience and reliable website functionality.
